T2S CHANGE REQUEST FORM		
General Information (Origin of Request) ☐ User Requirements (URD) or GUI Business Functionality Document (BFD) ☒ Other User Functional or Technical Documentation (SYS)		
Request raised by: 4CB	**Institute:** 4CB	**Date raised:** 22/10/2024
Request title: Upgrade of T2S messages to ISO MR 2025		**Request No.:** T2S 0841 SYS
Request type: Common	**Classification:** Standard Compliance	**Urgency:** Fast-track[1]
1. Legal/business importance parameter[2]: High		**2. Market implementation efforts parameter[3]:** Low
3. Operational/Technical risk parameter[4]: Low		**4. Financial impact parameter[5]:** Very High
Requestor Category: 4CB		**Status:** Allocated to a release

Reason for change and expected benefits/business motivation:

As part of the overall plan for yearly updates of the ISO messages versions in use in T2S, the implementation of ISO Maintenance Release 2025 is required.

Currently, T2S messages are based on ISO Maintenance Release 2019 and will be upgraded to ISO Maintenance Release 2024 in T2S R2026.JUN. Following the unfreeze strategy of the TARGET Services, the further upgrade to ISO MR 2025 will ensure an alignment of T2S registered messages with the latest ISO versions of the base messages and usage guidelines.

All impacted ISO registered messages will be migrated, irrespective of the type of change that applies, for instance:
- Changes due to ISO change requests (see below)
- Upgrade of schema version resulting from the migration of the base message to a higher version.

For all base (ISO) messages that have been migrated to a higher version due to the ISO maintenance release 2025, there will be a version upgrade of T2S customized messages in order to align the T2S message versions with the ISO message versions.

The following T2S messages are out of scope of the alignment with ISO MR 2025 as no change to the current version has been identified in relation to ISO Maintenance Release 2025:
acmt.007.001.05, acmt.010.001.04, acmt.011.001.04, acmt.015.001.04, acmt.019.001.04, admi.005.001.02, admi.006.001.01, admi.007.001.01, camt.003.001.08, camt.004.001.10, camt.005.001.11, camt.006.001.11, camt.009.001.08, camt.010.001.09, camt.011.001.08, camt.012.001.08, camt.018.001.05, camt.019.001.07, camt.024.001.08, camt.050.001.07, camt.051.001.07, camt.066.001.02, camt.067.001.02, camt.068.001.02, camt.069.001.05, camt.070.001.06, camt.071.001.05, camt.072.001.02, camt.073.001.02, camt.074.001.02, camt.075.001.02, camt.078.001.02, camt.079.001.02, camt.080.001.02, camt.081.001.02, camt.082.001.02, camt.083.001.02, camt.084.001.02, camt.085.001.02, colr.001.001.02, colr.002.001.02, head.001.001.04, reda.006.001.01, reda.007.001.01, reda.008.001.01, reda.009.001.01, reda.010.001.01, reda.012.001.01, reda.013.001.01, reda.014.001.02, reda.015.001.01, reda.016.001.01, reda.017.001.02, reda.018.001.01, reda.019.001.01, reda.020.001.01, reda.021.001.01, reda.022.001.02, reda.023.001.01, reda.029.001.01, reda.030.001.01, reda.031.001.01, reda.032.001.01, reda.033.001.01, reda.034.001.01, reda.035.001.01, reda.036.001.01, reda.037.001.01, reda.041.001.02, reda.042.001.01. reda.043.001.02, semt.020.001.07.

---

[1] Fast-track justification: A fast-track approach is requested because the business need of this change request was confirmed since it was part of the ISO unfreeze strategy approved by the T2S Steering Level.
[2] Legal/business importance parameter was set to 'High' because with this change request implemented, all T2S registered messages will be aligned with the latest ISO versions of the base messages and usage guidelines.
[3] Market implementation effort parameter was set to set to "Low" as the change does not imply significant changes to T2S Actors.
[4] Operational/technical risk parameter was set to "Low" because it is not expected that this change will have an operational impact on the T2S Actors.
[5] Low < 100kEUR < Low-Medium < 200 kEUR < Medium < 400kEUR < High < 700kEUR < Very high

Also excluded from this change request are the T2S DRAFT messages, which will be migrated to the latest Maintenance Release message versions after the completion of their registration process in 2025 and therefore are not in scope of this change request:
acmt.025, acmt.026, camt.076, camt.077, reda.024, reda.025, reda.026, reda.027, reda.028, reda.038, reda.039, reda.040, reda.044, reda.075, reda.077, semt.025, semt.026, semt.027, semt.028, semt.029, semt.030, semt.031, semt.032, semt.033, semt.034, semt.040, semt.044.
Furthermore, the business file header (head.002), which was registered in June 2024, will not be migrated from current T2S DRAFT3 head.002.001.01 to the ISO registered head.002.001.01 message in the scope of this change request. This is due to the significant impact of a migration of this message on all TARGET Services and considering CSD's request for an implementation of this change request in T2S R2026.JUN.

To ensure the ISO 20022 compatibility with ISO 20022 MR 2025 it is necessary to migrate the T2S messages to the newly ISO registered message versions. The impacted messages are:

- camt.025, will be migrated from camt.025.001.07 to camt.025.001.09
- camt.052, will be migrated from camt.052.001.12 to camt.052.001.13
- camt.053, will be migrated from camt.053.001.12 to camt.053.001.13
- camt.054, will be migrated from camt.054.001.12 to camt.054.001.13
- camt.064, will be migrated from DRAFT4camt.064.001.01 to camt.064.001.01
- camt.065, will be migrated from DRAFT4camt.065.001.01 to camt.065.001.01
- reda.045, will be migrated from DRAFT4reda.045.001.01 to reda.045.001.01
- reda.046, will be migrated from DRAFT4reda.046.001.01 to reda.046.001.01
- reda.047, will be migrated from DRAFT4reda.047.001.01 to reda.047.001.01
- reda.049, will be migrated from DRAFT2reda.049.001.01 to reda.049.001.01
- reda.050, will be migrated from DRAFT2reda.050.001.01 to reda.050.001.01
- reda.051 will be migrated from DRAFT2reda.051.001.01 to reda.051.001.01
- semt.002, will be migrated from semt.002.001.11 to semt.002.001.12
- semt.013, will be migrated from semt.013.001.06 to semt.013.001.07
- semt.014, will be migrated from semt.014.001.07 to semt.014.001.08
- semt.015, will be migrated from semt.015.001.09 to semt.015.001.10
- semt.016, will be migrated from semt.016.001.09 to semt.016.001.10
- semt.017, will be migrated from semt.017.001.12 to semt.017.001.13
- semt.018, will be migrated from semt.018.001.13 to semt.018.001.14
- semt.019, will be migrated from semt.019.001.10 to semt.019.001.11
- semt.022, will be migrated from semt.022.001.05 to semt.022.001.06
- sese.020, will be migrated from sese.020.001.07 to sese.020.001.08
- sese.021, will be migrated from sese.021.001.06 to sese.021.001.07
- sese.022, will be migrated from sese.022.001.06 to sese.022.001.07
- sese.023, will be migrated from sese.023.001.11 to sese.023.001.12
- sese.024, will be migrated from sese.024.001.12 to sese.024.001.13
- sese.025, will be migrated from sese.025.001.11 to sese.025.001.12
- sese.027, will be migrated from sese.027.001.07 to sese.027.001.08
- sese.028, will be migrated from sese.028.001.10 to sese.028.001.11
- sese.029, will be migrated from sese.029.001.06 to sese.029.001.07
- sese.030, will be migrated from sese.030.001.09 to sese.030.001.10
- sese.031, will be migrated from sese.031.001.09 to sese.031.001.10
- sese.032, will be migrated from sese.032.001.11 to sese.032.001.12

As a result, DRAFT versions of recently registered T2S ISO messages will be replaced with final ISO registered message versions. The impacted messages are: camt.064, camt.065, reda.045, reda.046, reda.047, reda.049, reda.050, reda.051.

Sample XML messages on MyStandards and UDFS documentation will also be updated if applicable.

The message versions exchanged with different TARGET Services (T2 and ECMS) will be migrated as well.

Besides these changes, a migration to the new BIC pattern from ISO CR-0751 will be taken into account in this T2S ISO maintenance release CR as agreed during the assessment of T2S-CR-0809.
The ISO CR-0751 was implemented in two steps, consisting of CR-001473 and CR-001578. With T2S CR-0809 only the second step, i.e. CR 1578 (ISO CR-0751), has been implemented. The first step, i.e. CR 1473 (ISO CR-0751) will be implemented as defined in the scope of this T2S CR. As a result, the BIC pattern is expected to be aligned across all T2S usage guidelines that are based on registered ISO messages (with the exception of DRAFT

messages). This change requires no update of message version for the messages impacted.
The BIC datatype will also be aligned in messages used in the internal communication between TARGET services, when the old or a customized datatype is currently still in use. This applies for instance to all BIC elements present in the head.001 message where a customized datatype can be adapted to the new ISO datatype to ensure an alignment.
All T2S messages impacted by this change will be listed in the annex.

Description of requested change:

The alignment of the T2S messages with ISO Maintenance Releases 2025 and the migration of the T2S messages to the official ISO registered versions leads to several changes on the messages. These high level-changes are listed below. However, not every high-level change on the ISO base message will finally require a change in the T2S customized message. Therefore, the detailed description of the updates can be found within the tracking table to be attached to this CR.

The full list of changes which were part of the ISO MR 2025 ("ISO CRs") can be found here: http://www.iso20022.org/catalogue_of_change_requests.page
In addition, MT SR 2025 may also have an impact on ISO messages. The full list of changes which were part of the MT SRs 2025 ("CRs") can be found in MyStandards (access restricted to MyStandards registered users): https://www2.swift.com/mystandards/#/changerequest

4CB has identified ISO and MT change requests, which impact the T2S customized messages.
- ISO CR-1372
- ISO CR-1406
- ISO CR-1408
- ISO CR-1416 (in relation with ISO CR-1346)
- MT CR 2003

The ISO Maintenance Release leads in some cases to the change of TargetNamespace without any other changes of the message. This change conducts to a xsd schema change.

The alignment of the T2S messages with the ISO Maintenance Releases 2025 may lead to changes on the Flat files, DMT files and Securities Valuation flat files.

During the detailed assessment it will be analyzed if there are also changes on the GUI required to ensure the alignment of U2A and A2A as well as contingency tools impacts (AID Tool, Omega Tool, MOP Contingency templates)

Furthermore, an alignment of T2S Recovery with the new MR 2025 version of T2S messages is required and the impact on implementation and testing of the T2S recovery solution will be analysed in the scope of this change request (e.g. upgrade of ITEF and TIE test environments).

In T2S, the new message versions will be activated between End of Day and Start of Day.

Submitted annexes / related documents:

A file entitled T2S_0841_SYS_attachment, includes all the changes to the T2S messages.

The annex shows only the relevant changes for T2S messages, i.e. all changes that are not applied to the T2S messages are not included as they represent new functionalities for which dedicated CRs are needed.

Outcome/Decisions:

*CRG on 13 November 2024: the CRG agreed to recommend CR-0841 for authorisation by the T2S Steering Level, following a fast-track approach.
*AMI-SeCo on 26 November 2024: the AMI-SeCo agreed with the CRG recommendation of CR-0841 for T2S Steering Level Authorisation.
*CSG on 26 November 2024: the CSG agreed to authorise CR-0841.
*NECSG on 26 November 2024: the NECSG agreed to authorise CR-0841.

*MIB on 5 December 2024: the MIB agreed to authorise CR-0841.
*PMG on 10 December 2024: the PMG agreed to launch the detailed assessment of CR-0841 with a view of scoping in R2026.JUN.

*CRG on 28 November 2024: the CRG took note that the implementation of ISO CR-1404 in the ISO 20022 base messages camt.067 and camt.068 could not be achieved in the current maintenance cycle (MR2025) and thus will be postponed to MR2026. Accordingly, ISO CR-1404 was removed from the scope of CR-841, meaning that the supplementary data element "supl.021" will be used further both in T2S camt and semt messages. A change to integrate the reference in the payload of T2S messages can be envisaged later with the upgrade to ISO MR2026 (for camt and semt), once the ISO CR is fully implemented on ISO 20022 base message level.

*Trilateral Group on 21 February 2025: the Trilateral group agreed, to accommodate the T2 exception request, to support "Option A" for the ISO MR2025, i.e., to implement the upgrade to MR2025 in R2026.NOV.

*PMG on 24 February 2025: the PMG agreed to launch the detailed assessment of CR-0841 with a view of scoping in R2026.NOV.
*CRG on 20 May 2025: The CRG agreed to recommend to the PMG the inclusion of CR-0841 within the scope of R2026.NOV.
*OMG on 21 May 2025: The OMG did not identify any operational impact of the inclusion of CR-0841 within the scope of R2026.NOV
*PMG on 21 May 2025: the PMG agreed to recommend the inclusion of CR-0841 in the scope of R2026.NOV.
*CSG on 17 June 2025: the CSG approved the inclusion of CR-0841 in the scope of R2026.NOV.
*NECSG on 17 June 2025: the NECSG approved the inclusion of CR-0841 in the scope of R2026.NOV.
*MIB on 27 June 2025: the MIB approved the inclusion of CR-0841 in the scope of R2026.NOV.

Documentation to be updated:

*** The current wording proposal is not to be considered as final. An exhaustive analysis of the changes required in the Scope Defining Documents will be conducted during the implementation phase of the Change Request. ***

The UDFS will be updated in line with the necessary changes.
The annex lists all changes on the T2S messages, i.e.
- New message versions
- All changes in the XSD schemas
- New datatype names
- UDFS updates

The subchapters
  -    3.3.2.8 ReceiptV07 (camt.025.001.07),
  -    3.3.2.11 BankToCustomerAccountReportV12,
  -    3.3.2.12 BankToCustomerStatementV12 and
  -    3.3.2.13 BankToCustomerDebitCreditNotificationV12 and
  -    3.3.4.1 BusinessApplicationHeaderV04 (head.001.001.04) need to be updated to reflect all changes listed in the annex.
Wordings will be provided during the implementation phase.
Also subchapters
  -    2.13,
  -    2.14,
  -    2.15,
  -    2.16,
  -    2.17,
  -    2.19 and
  -    2.22 need to be updated to reflect the new message namespaces.

2.3.7.2 Identification of failed Unmatched Settlement Instructions

[Unmatched Settlement Instructions not identified as "Failing" before] The instructing T2S Actor is provided with the relevant "Party Hold" [], "CSD Hold" [], "CSD Validation Hold"[], "Other Hold remains[], "No hold remain/exist"[] SecuritiesSettlementTransactionStatusAdviceV13~~0~~ (sese.024.001.13~~20~~) including the "Failing" ISO settlement status with the applicable reason(s) for failure

3.3.5.3 IntraPositionMovementStatusAdviceV08~~6~~ (semt.014.001.08~~6~~)

3.3.5.3.1 Overview and scope of the message

This chapter illustrates the IntraPositionMovementStatusAdviceV08~~6~~ message. The IntraPositionMovementStatusAdviceV08~~6~~ message, also known as a Securities Settlement Restriction Status Advice, is sent by T2S to a CSD or other directly connected T2S party to inform about the actual status of the to-be restricted amount (specified in the message) of Securities Settlement Restriction instruction semt.013.001.07~~4~~ [1076] which has been previously sent to T2S (i.e. a (un)blocking, (un)earmarking, or (un)reserve instruction).

3.3.5.3.2 The T2S-specific schema

Outline of the schema

The IntraPositionMovementStatusAdviceV08~~6~~ is composed of the following message building blocks:

References/Links

The T2S-specific schema, the additional schema required to fill the "Supplementary Data" block and documentation in HTML/PDF format as well as the message examples are provided outside of this document under the following link.

http://www.swift.com/mystandards/T2S/semt.014.001.086_T2S

3.3.5.3.3 The message in business context

Message usage: Rejected

Specific message requirements

To inform about a rejection status, the IntraPositionMovementStatusAdviceV0~~86~~ includes the following information

Message usage example: semt.014.001.08~~6~~_T2S_Rejected_Example.xml

Message usage: Accepted

Specific message requirements

To inform about an accepted status, the IntraPositionMovementStatusAdviceV08~~6~~ includes the following information:

Message usage example: semt.014.001. 08~~6~~_T2S_AcceptedPending_Example.xml

Message usage example 2: semt.014.001. 08~~6~~_T2S_AcceptedFailing_Example.xml

Message usage: Cancelled

Specific message requirements
To inform about a cancelled status, the IntraPositionMovementStatusAdviceV08~~6~~ includes the following information:

Message usage example: semt.014.001. 08~~6~~_T2S_Cancelled_Example.xml

Message usage: Eligibility failure

Specific message requirements

To inform about a pending/failing status due to an eligibility failure, the IntraPositionMovementStatusAdviceV08~~6~~ includes the following information:

Message usage example 1: semt.014.001. 08~~6~~_T2S_PendingEligibilityFailure_Example.xml

Message usage example 2: semt.014.001. 08~~6~~_T2S_FailingEligibilityFailure_Example2.xml

Message usage: Intraday restriction

To inform about a pending/failing status due to an intraday restriction, the IntraPositionMovementStatusAdviceV08~~6~~ includes the following information:

Message usage example 1: semt.014.001. 08~~6~~_T2S_PendingIntradayFailure_Example.xml

Message usage example 2: semt.014.001. 08~~6~~_T2S_FailingIntradayFailure_Example2.xml

Message usage: Provision check failure

Specific message requirements

To inform about a pending/failing status, the IntraPositionMovementStatusAdviceV08~~6~~ includes the following information:

Message usage example 1: semt.014.001. 08~~6~~_T2S_PendingProvisionFailure_Example.xml

Message usage example 2: semt.014.001. 08~~6~~_T2S_FailingProvisionFailure_Example2.xml

Message usage: Partial settlement (unsettled part)

Specific message requirements

To inform about the unsettled part of a partial filling reservation, the IntraPositionMovementStatusAdviceV08~~6~~ includes the following information:

Message usage example1: semt.014.001. 08~~6~~_T2S_PendingPartialSettlement_Example.xml

Message usage example 2: semt.014.001. 08~~6~~_T2S_FailingPartialSettlement_Example.xml

3.3.5.4 IntraPositionMovementConfirmationV07~~7~~10 (semt.015.001.07~~7~~10)

3.3.5.4.1 Overview and scope of the message

This chapter illustrates the IntraPositionMovementConfirmationV07~~7~~10 message.

The IntraPositionMovementConfirmationV07~~7~~10 message, also known as a Securities Settlement Restriction Confirmation, is sent by T2S to a CSD or other directly connected T2S party to confirm the

successful processing of a Securities Settlement Restriction instruction sent via a semt.013.001.0~~7~~4 [076] message (i.e., a (un)blocking, (un)earmarking or (un)reserve instruction).

When the Securities Settlement Restriction related to a reservation restriction processing type has been partially filled, T2S sends in addition to the confirmation a semt.014.001.0~~8~~ [1085] ~~6~~ to inform about the actual status of the Securities Settlement Restriction instruction sent via a semt.013.001.0~~7~~4 [1076] message, waiting to complete the reservation.

In case of dynamic reimbursement, or in case of an automated substitution achieved with the collateralisation operation, T2S sends an IntraPositionMovementConfirmationV10~~7~~ to confirm the full settlement of the blocking of the collateral or the settlement of the released reverse collateral Settlement Restriction.

3.3.5.4.2 The T2S-specific schema

Outline of the schema

The IntraPositionMovementConfirmationV0~~7~~10 is composed of the following message building blocks:

References/Links

The T2S-specific schema, the additional schema required to fill the "Supplementary Data" block and documentation in HTML/PDF format as well as the message examples are provided outside of this document under the following link.

http://www.swift.com/mystandards/T2S/semt.015.001.10~~7~~_T2S

3.3.5.4.3 The message in business context

Message usage: Full settlement

Specific message requirements

To confirm a fully settled Securities Settlement Restriction, the IntraPositionMovementConfirmationV10~~7~~ includes the following information:

Message usage example 1: semt.015.001.10~~7~~_T2S_FullSettlement_Example.xml

Message usage example 2: semt.015.001. 10~~7~~_T2S_FullSettlement_Example2.xml

Message usage: Partial settlement (settled part)

Specific message requirements

To confirm a partial filling of a reservation, the IntraPositionMovementConfirmationV10~~7~~ includes the following information:

Message usage example: semt.015.001. 0~~7~~10_T2S_PartialSettlement_Example.xml

Message usage: Last Partial Settlement

Specific message requirements

Message usage example: semt.015.001. 0~~7~~10_T2S_LastPartialSettlement_Example.xml

Message usage: Partial execution

Specific message requirements

To confirm a partial execution of earmarking restriction processing type, the
IntraPositionMovementConfirmationV10~~7~~ includes the following information:

Message usage example: semt.015.001. 0~~7~~10_T2S_PartialExecution_Example.xml

3.3.5.6 SecuritiesTransactionPostingReportV09~~13~~ (semt.017.001.09~~13~~)

3.3.5.6.1 Overview and scope of the message

This chapter illustrates the SecuritiesTransactionPostingReportV09~~13~~ message.

The SecuritiesTransactionPostingReportV09~~13~~ message, also known as Statement of Transactions, is
sent by T2S to a CSD or other directly connected T2S party authorised by them. It is used to give
information about the transactions of the respective CSD or other directly connected T2S party, settled
in T2S for a particular settlement day. This report is triggered by a defined business and time events.

3.3.5.6.2 The T2S-specific schema

Outline of the schema

The SecuritiesTransactionPostingReportV09~~13~~ is composed of the following message building blocks:

References/Links

The T2S-specific schema and documentation in HTML/PDF format as well as the message examples
are provided outside of this document under the following link:

http://www.swift.com/mystandards/T2S/semt.017.001.0913_T2S

Message usage: Cancellation Requested

Specific message requirements

To inform about a pending status due to a cancellation requested, the
SecuritiesSettlementTransactionStatusAdviceV1~~3~~0 includes the following information:

Message usage example: sese.024.001. 1~~3~~0_T2S_CancellationRequested_Example.xml

Message usage: Partial Settlement (unsettled part)

Specific message requirements

To inform about the unsettled part of a partial filling, the
SecuritiesSettlementTransactionStatusAdviceV1~~3~~0 includes the following information:

Message usage example1: sese.024.001. 1~~3~~0_T2S_PendingPartialSettlement_Example.xml

~~T2S_PartialSettlement_Example.xml~~

Message usage example2: sese.024.001. 1~~3~~0_T2S_FailingPartialSettlement_Example.xml

Message usage: Partial Settlement (unsettled part) of a settlement instruction partially released

Specific message requirements

To inform about the unsettled part of a partial filling, the
SecuritiesSettlementTransactionStatusAdviceV1~~3~~0 includes the following information:

Message usage example: sese.024.001. 1~~3~~0 _T2S_PartialSettlement of partially released quantity
Example01.xml

Message usage example: sese.024.001. 1~~3~~0_T2S_PartialSettlement of partially released quantity
Example02.xml

Message usage: Execution of a partial release

Specific message requirements

To inform about the execution of a partial release, the
SecuritiesSettlementTransactionStatusAdviceV1~~3~~0 includes the following information:

Message usage example: sese.024.001. 1~~3~~0 _T2S_PendingPartialRelease execution_Example01.xml

Message usage example: sese.024.001. 1~~3~~0_T2S_PendingPartialRelease execution_Example02.xml

Message usage: Settlement of a partial release

Specific message requirements

To inform about the settlement of a partial release, the SecuritiesSettlementTransactionStatusAdviceV1~~3~~0 includes the following information for the delivering side of the transaction:

Message usage example: sese.024.001. 1~~3~~0_T2S_PartialRelease settlement_Example01.xml

Message usage example: sese.024.001. 1~~3~~0_T2S_PartialRelease settlement_Example02.xml

Message usage: Cancellation of a partial release

Specific message requirements

To inform about the cancellation of a partial release, the SecuritiesSettlementTransactionStatusAdviceV1~~3~~0 includes the following information for the delivering side of the transaction:

Message usage example: sese.024.001. 1~~3~~0_T2S_PartialRelease _ cancellation Example01.xml

Message usage example: sese.024.001. 1~~3~~0 _T2S_PartialRelease cancellation _Example02.xml

3.3.6.6 SecuritiesSettlementTransactionConfirmationV09 (sese.025.001.~~09~~12)

3.3.6.6.1 Overview and scope of the message

This chapter illustrates the SecuritiesSettlementTransactionConfirmationV~~09~~12 message.

The SecuritiesSettlementTransactionConfirmationV~~09~~12 message, also known as a Securities Settlement Confirmation, is sent by T2S to inform about the partial or full successful completion of settlement.

3.3.6.6.2 The T2S-specific schema

Outline of the schema

The SecuritiesSettlementTransactionConfirmationV~~09~~12 is composed of the following message building blocks:

References/Links

The T2S-specific schema, the additional schema required to fill the "Supplementary Data" block and documentation in HTML/PDF format as well as the message examples are provided outside of this document under the following link.

http://www.swift.com/mystandards/T2S/sese.025.001.~~09~~12 _T2S

3.3.6.6.3 The message in business context

Message usage: Full Settlement

Specific message requirements

To confirm a fully settled Settlement Instruction, the

SecuritiesSettlementTransactionConfirmationV0912 includes the following information:

Message usage example 1: sese.025.001. 0912_T2S_FullSettlement_Example.xml

Message usage example 2: sese.025.001. 0912_T2S_FullSettlement_SAC earmarked at account level Example.xml

Message usage: Partial Settlement (settled part)

Specific message requirements

To confirm a partial settlement of a Settlement Instruction, the SecuritiesSettlementTransactionConfirmationV0912 includes the following information:

Message usage example: sese.025.001. 0912_T2S_PartialSettlement_Example.xml

Message usage: Last Partial Settlement

Specific message requirements

To confirm a last partial settlement of a Settlement Instruction, the SecuritiesSettlementTransactionConfirmationV0912 includes the following information:

Message usage example: sese.025.001. 0912_T2S_LastPartialSettlement_Example.xml

3.3.6.7 SecuritiesTransactionCancellationRequestStatusAdviceV058 (sese.027.001.058)

3.3.6.7.1 Overview and scope of the message

This chapter illustrates the SecuritiesTransactionCancellationRequestStatusAdviceV058 message. The SecuritiesTransactionCancellationRequestStatusAdviceV058 message, also known as Cancellation Status Advice, is sent by T2S to a CSD or any party authorised by them to inform about the actual status of a Cancellation Instruction which has been previously sent to T2S.

The Cancellation Status Advice refers to the original Cancellation Instruction sese.020.001.058 [} 1212] and informs about the actual status of the Cancellation. When the Cancellation Instruction is invalid, the Cancellation Status Advice also specifies the reason why it could not be processed.

3.3.6.7.2 The T2S-specific schema

Outline of the schema

The SecuritiesTransactionCancellationRequestStatusAdviceV058 is composed of the following message building blocks:

References/Links

The T2S-specific schema and documentation in HTML/PDF format as well as the message examples are provided outside of this document under the following link:

http://www.swift.com/mystandards/T2S/sese.027.001. 058_T2S

3.3.6.7.3 The message in business context

Message usage: Rejected

Specific message requirements

To inform about a rejection status, the SecuritiesTransactionCancellationRequestStatusAdviceV058

includes the following information:

Message usage example: sese.027.001. 0~~5~~8_T2S_Rejected_Example.xml

Message usage: Accepted

Specific message requirements

To inform about an accepted status, the SecuritiesTransactionCancellationRequestStatusAdviceV0~~5~~8 includes the following information:

Message usage example: sese.027.001. 0~~5~~8_T2S_Accepted_Example.xml

Message usage: Denied

Specific message requirements

To inform about a denied status, the SecuritiesTransactionCancellationRequestStatusAdviceV0~~5~~8 includes the following information:

Message usage example: sese.027.001. 0~~5~~8_T2S_Denied_Example.xml

Message usage: Cancellation pending from Administering Party

Specific message requirements

To inform about a Cancellation pending from Administering Party to the Administering Party, SecuritiesTransactionCancellationRequestStatusAdviceV0~~5~~8 includes the following information:

Message usage example: sese.027.001. 0~~5~~8_T2S_CancellationWaitingfromAP_Example.xml

Message usage: Pending Cancellation, awaiting confirmation from the Counterparty

Specific message requirements

To inform about a pending cancellation, awaiting confirmation from the Counterparty, the SecuritiesTransactionCancellationRequestStatusAdviceV0~~5~~8 includes the following information:

Message usage example: sese.027.001. 0~~5~~8_T2S_Waiting_Example.xml

Message usage: Executed

Specific message requirements

To inform about the execution of the cancellation, the SecuritiesTransactionCancellationRequestStatusAdviceV0~~5~~8 includes the following information:

Message usage example: sese.027.001. 0~~5~~8_T2S_Executed_Example.xml

3.3.6.8 SecuritiesSettlementTransactionAllegementNotificationV08 (sese.028.001.11~~08~~)

3.3.6.8.1 Overview and scope of the message

This chapter illustrates the SecuritiesSettlementTransactionAllegementNotificationV11~~08~~ message.

The SecuritiesSettlementTransactionAllegementNotificationV11~~08~~ message, also known as an Allegement, is sent by T2S to a CSD or any party authorised by them. It is used when an instruction which has been sent by a counterparty is still (after an unsuccessful matching attempt) waiting for the missing Settlement Instruction.

3.3.6.8.2 The T2S-specific schema

Outline of the schema

The SecuritiesSettlementTransactionAllegementNotificationV11<s>08</s> is composed of the following message build ing blocks:

References/Links

The T2S-specific schema and documentation in HTML/PDF format as well as the message examples are provided outside of this document under the following link:

http://www.swift.com/mystandards/T2S/sese.028.001. 11<s>08</s>_T2S

3.3.6.8.3 The message in business context

Message usage example: sese.028.001. 11<s>08</s>_T2S_Allegement_Example.xml

3.3.6.9 SecuritiesSettlementAllegmentRemovalAdviceV04 (sese.029.001.0<u>7</u><s>4</s>)

3.3.6.9.1 Overview and scope of the message

This chapter illustrates the SecuritiesSettlementAllegementRemovalAdviceV0<u>7</u><s>4</s> message.

The SecuritiesSettlementAllegementRemovalAdviceV0<u>7</u><s>4</s> message, also known as an Allegement Removal, is sent by T2S to a CSD or any party authorised by them. It is used to inform that the previously sent allegement is no longer valid, because the alleged party has in the meantime sent its instruction.

3.3.6.9.2 The T2S-specific schema

Outline of the schema

The SecuritiesSettlementAllegementRemovalAdviceV0<u>7</u><s>4</s> is composed of the following message building blocks:

References/Links

The T2S-specific schema and documentation in HTML/PDF format as well as the message examples are provided outside of this document under the following link:

http://www.swift.com/mystandards/T2S/sese.029.001. 0<u>7</u><s>4</s>_T2S

3.3.6.9.3 The message in business context

Message usage example: sese.029.001. 0<u>7</u><s>4</s>_T2S_AllegementRemoval_Example.xml

3.3.6.11 SecuritiesSettlementConditionModificationStatusAdviceV08 (sese.031.001. 1<u>0</u><s>8</s>)

3.3.6.11.1 Overview and scope of the message

This chapter illustrates the SecuritiesSettlementConditionModificationStatusAdviceV1<u>0</u><s>8</s> message.

The SecuritiesSettlementConditionModificationStatusAdviceV1<u>0</u><s>8</s> message, also known as an Amendment Instruction status advice or Hold/Release status advice is sent by T2S to a CSD or other directly connected T2S party to inform about the actual status of a SecuritiesSettlementConditionModificationStatusAdviceV08 (sese.030.001.1<u>0</u><s>8</s>) [} 1337].

3.3.6.11.2 The T2S-specific schema

Outline of the schema

The SecuritiesSettlementConditionModificationStatusAdviceV10 8 is composed of the following message building blocks:

References/Links

The T2S-specific schema and documentation in HTML/PDF format as well as the message examples are provided outside of this document under the following link:

http://www.swift.com/mystandards/T2S/sese.031.001._10 8_T2S

3.3.6.11.3 The message in business context

Message usage: Rejected

Specific message requirements

To inform about a rejection status, the SecuritiesSettlementConditionModificationStatusAdviceV10 8 includes the following information:

Message usage example: sese.031.001._10 8_T2S_Rejected_Example.xm

Message usage: Accepted

Specific message requirements

To inform about an accepted status, the SecuritiesSettlementConditionModificationStatusAdviceV10 8 the following information:

Message usage example: sese.031.001. 10 8_T2S_Accepted_Example.xml

Message usage: Denied

Specific message requirements

To inform about a denied status, the SecuritiesSettlementConditionModificationStatusAdviceV10 8 includes the following information:

Message usage example: sese.031.001._10 8 _T2S_Denied_Example.xml

Message usage: Executed

Specific message requirements

To inform about the completion of the Amendment or Hold/Release, the SecuritiesSettlementConditionModificationStatusAdviceV10 8 includes the following information:

Message example: sese.031.001. 10 8_T2S_Executed_Example.xml

OVERVIEW OF THE IMPACT OF THE REQUEST ON THE T2S SYSTEM AND ON THE PROJECT

Summary of functional, development, infrastructure and migration impacts

Update of usage guidelines, schemas, examples in MyStandards and UDFS message chapters resulting from changes introduced by the ISO Standards Release 2025. These are outlined in detail within a tracking table document. The message updates described in the annex have to be implemented within the T2S customised guidelines along with the update of the corresponding message examples.

For the change of schema in camt.025 introducing the new cross element complex rule listed in the annex, no new business rule is foreseen as it is assumed that all services communicating with T2S create response messages according to the business requirements of T2S.

Change of BIC pattern due to CR#1473 (first step of ISO CR-0751):
- camt.052, camt.053, camt.054, semt.002, semt.014, semt.017, semt.018, semt.019, semt.022, sese.020, sese.021, sese.023, sese.024, sese.025, sese.028, sese.030, sese.031, sese.032 are already in scope of the ISO MR 2025 upgrade, so the change will be implemented in the new version.
- camt.003, camt.004, camt.005, camt.006, camt.009, camt.010, camt.069, camt.070, admi.005 are not in scope of the ISO MR 2025 upgrade, so the change will be implemented in the current version (i.e. ISO MR 2024).

Note that for admi.005, the change of BIC pattern was originally done in the base message upon ISO registration, so it is not listed in the impacted messages of https://www2.swift.com/mystandards/#/cr/1473 .

Regarding the corresponding T2-0147-SYS, T2 community requested to deploy the seven RTGS core messages (pacs.002/004/008/009/010, camt.029/056) in T2 EAC and T2 UTEST in parallel to allow sufficient testing time. The remaining T2 messages will be deployed on T2 UTEST in parallel to T2S UTEST later according the regular release schedule. This late request caused an extension of the parallel started DA which in turn might require a re-DA of CR-0841.

Planning for delivery of the non-binding and binding schema files for T2S R2026.NOV, derived from previous T2S CRs on ISO MR (swaps between batches possible):

Milestones	From - To	Schema
Batch #1	22.05.2026	camt.004, 025, 053 sese.020, 023, 024, 025, 027, 028, 029, 032
Batch #2	29.05.2026	reda.045, 046, 047, 049, 050, 051 semt.013, 014, 015 sese.030, 031
Batch #3	05.06.2026	camt.003, 005, 006, 009, 010, 064, 065 semt.002
Batch #4	12.06.2026 (8 weeks before EAC)	admi.005 camt.052, 054, 069, 070 semt.016, 017, 018, 019, 022 sese.021, 022
Delivery of binding XSD schemas via MyStandards	9 business days before EAC Deployment	

A common delivery of non-binding and binding XSDs will be planned for this CR and T2S CR-0843.

Main Cost Drivers:
- Update of external and internal documentations and functional specifications, also MyStandards including external support (SWIFT): 27%
- Implementation of the updated message schemas: 37%
- Functional validation and non-regression test campaign, adaptation of testing tools: 26%

Impact on other TARGET Services and projects:

Impact on T2:
New version and alignment of messages exchanged between T2S and T2: camt.025, camt.053, head.001

Impact on ECMS:
New version and alignment of messages exchanged between T2S and ECMS: sese.020, sese.023, sese.024, sese.025, sese.027, sese.032. Detailed assessment of the **ECMS-100-SYS -ISO Unfreeze MR2025** is still pending and could impact current planning and may require reassessment of the T2S-0841-SYS.

No impact on TIPS.

Summary of project risk

No risk identified during detailed assessment.
Security analysis
No adverse effect identified during security assessment.
