

REAL-TIME ENABLEMENT WITH TIPS AND VOLANTE TECHNOLOGIES

Essential “tips” for getting the most out of instant payments with TIPS

Dome Scaffidi
Business Development Director Europe and Asia

Think Different

Focus on creation of differentiated value-added services

Look at corporate as well as retail use cases

Think End to End

End-to-end real-time customer experience

Is your technology open banking and API enabled?

Have you thought about liquidity impacts?

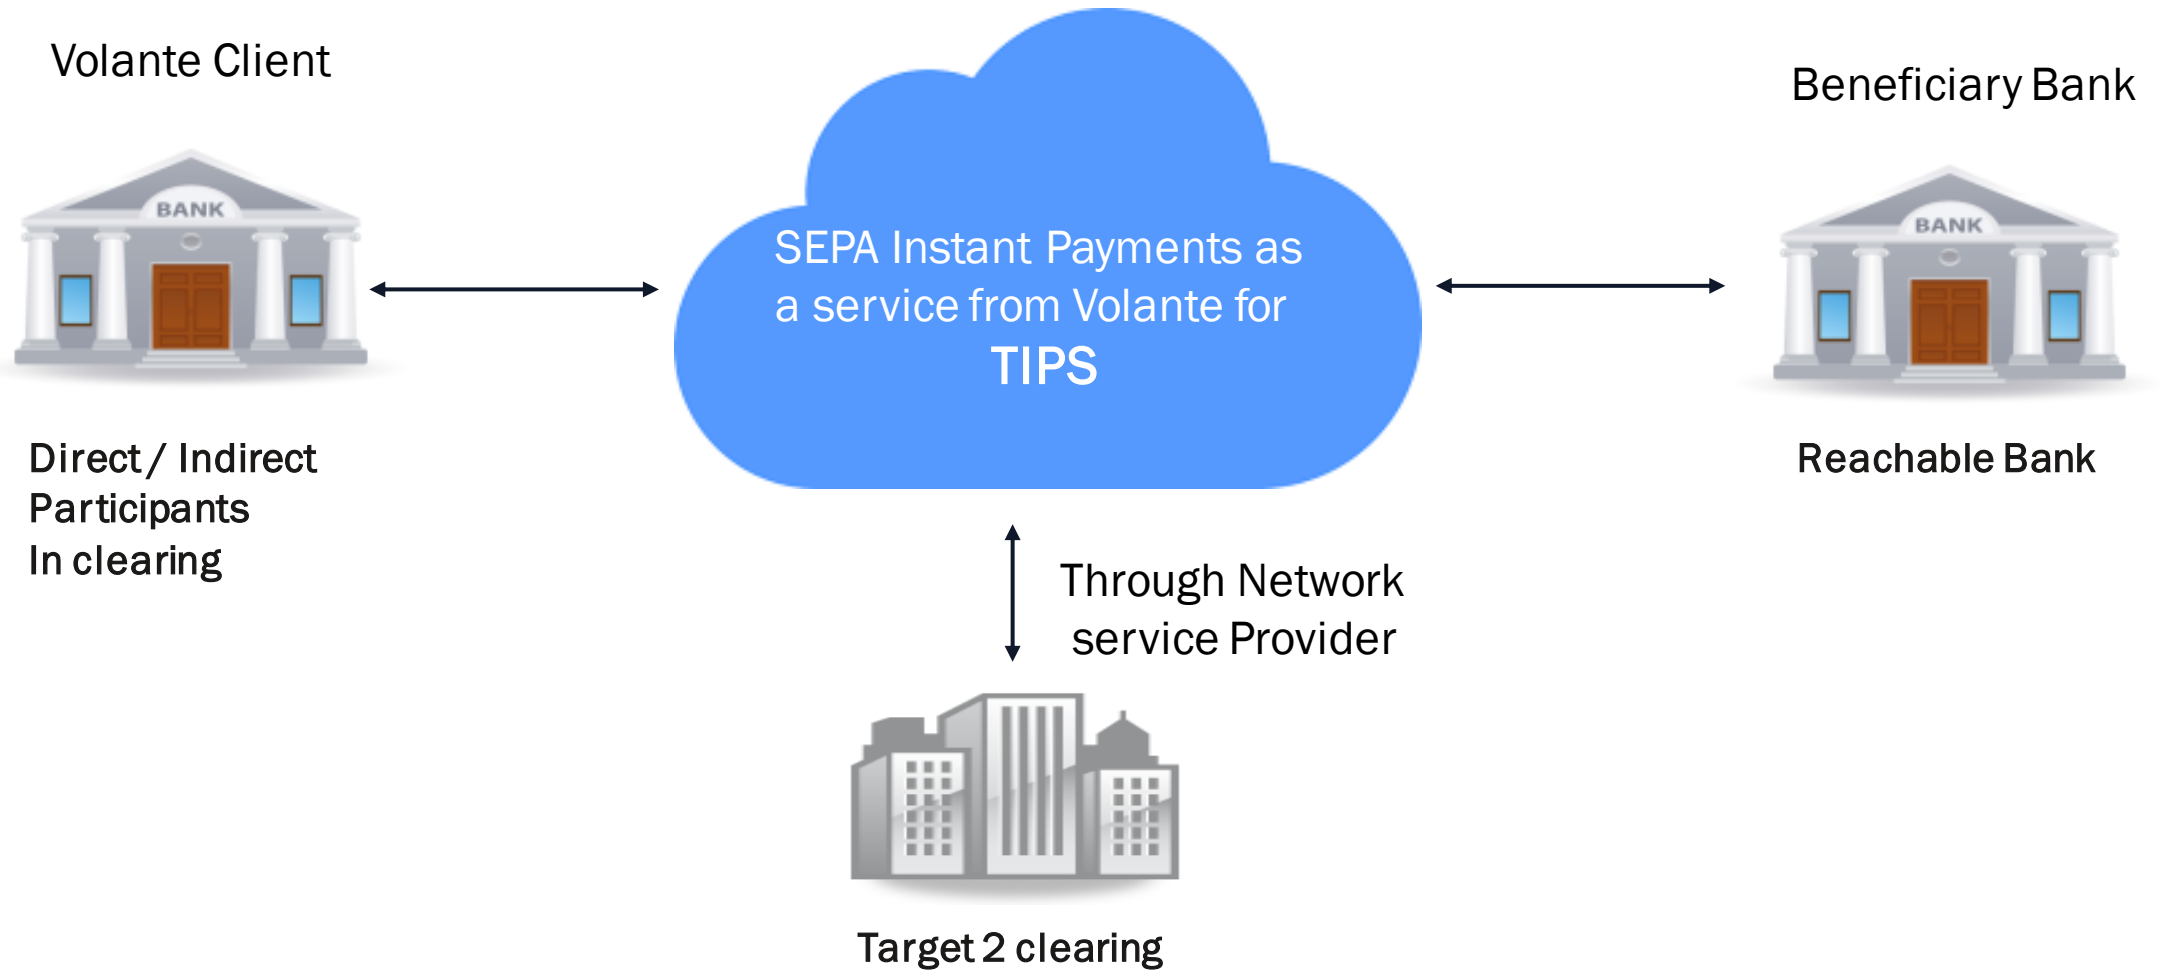

Think Cloud

Get on board with very low investment

Start with low volumes, scale up smoothly

Try different service models and products in an agile way

VolPay

Instant payments as a service
End-to-end processing and
connectivity for TIPS

Awarded
**Best
Payment
System**
2019

Proven in real-time payments – first US RTP payment in history initiated through VolPay

Proven in the cloud – first implementation of SEPA as a managed service on Microsoft Azure

Leaders in open banking and API orchestration for end-to-end real-time API enablement

Cloud-based ecosystem of payments business services provides ideal platform for building new customer experiences and value-added services on top of TIPS

Fastest implementation – easy integration with existing systems without ‘rip and replace’

Ability to meet scheme SLA/compliances

Saving long project cycles for implementation and reduce Capex

Future Regulatory changes to be handled and provided by Volante

Zero downtime deployment for adding any new rails or customer or service etc.

*Thank
you*
